

# Microsoft Priva - Risk Management

Leon Butler – Director, Advisory  
Maha AbuRumman – Compliance Specialist Microsoft

# Not an easy task, difficult to manage and identify risks

# Conventional privacy management

## Challenges

Focuses on finding personal data for recordkeeping

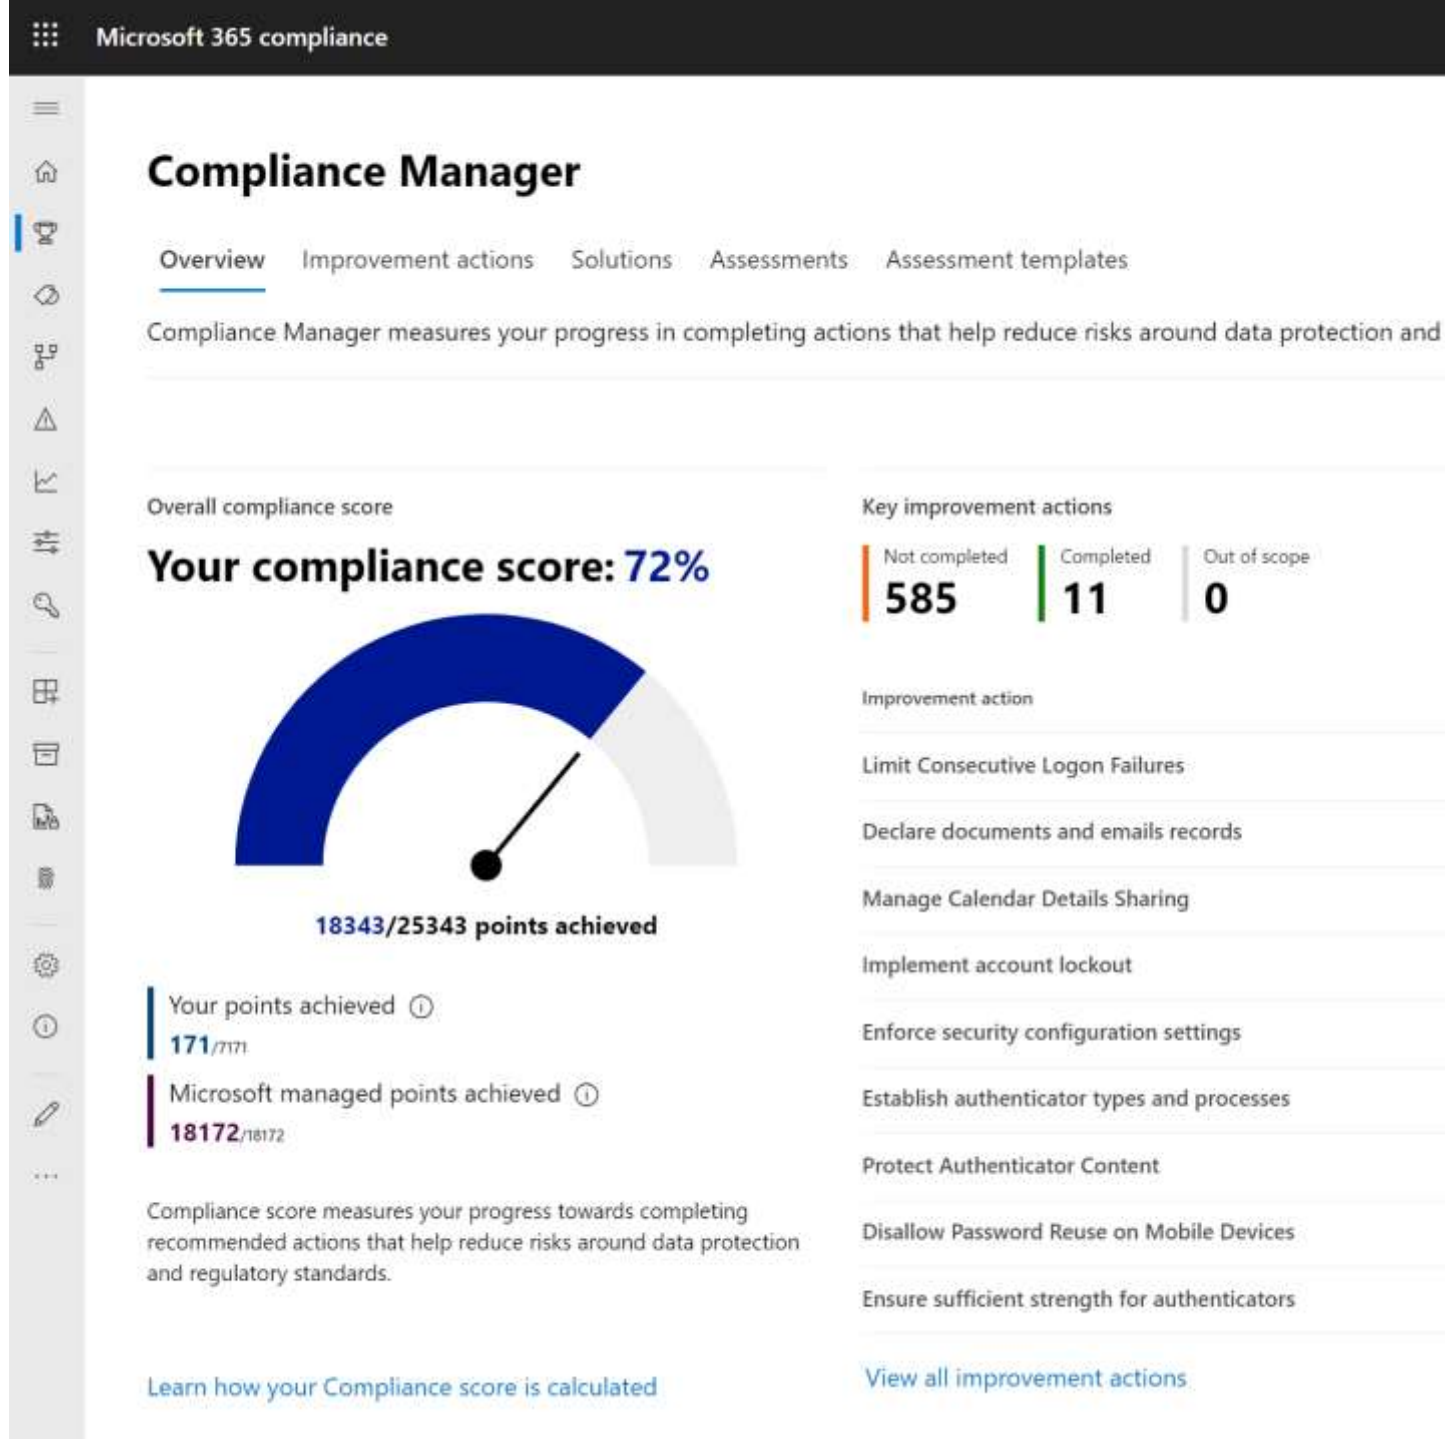

Lacks actionable insights to improve privacy posture

Relies heavily on survey and task assignments to get point-in-time inventory or fulfill subject requests

# Assess your privacy compliance with Compliance Manager

Over 600 out-of-box Data protection and Privacy assessment templates at [aka.ms/compliancemanager](https://aka.ms/compliancemanager)

# Global Data Residency (and Sovereignty)

## Global geos

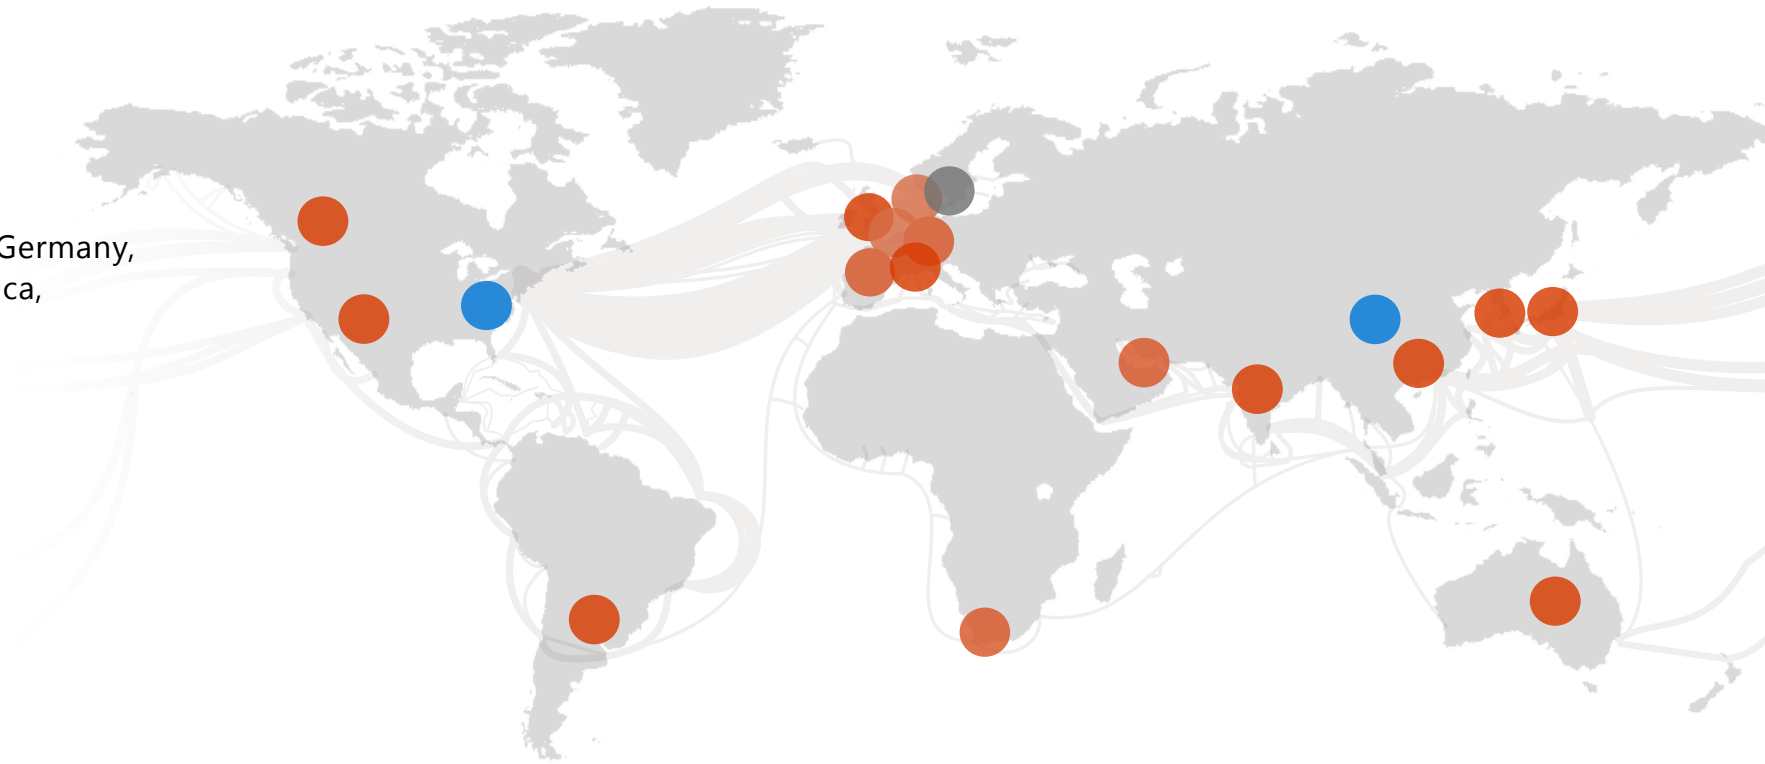

Core Geos: EMEA/EU, Asia Pacific, Americas  
Local Geos: Australia, Brazil, Canada, France, Germany, India, Japan, South Korea, Norway, South Africa, Switzerland, UAE, UK, USA

## Upcoming geos

Sweden (TBC)

## Sovereign Clouds

US Government, China (21Vianet)

# Multi-Geo in Microsoft 365

Multi-Geo extends a single Microsoft 365 tenant to multiple geographic regions and/or countries (Geos), giving you control over where each employee's Microsoft 365 data is stored at-rest.

Exchange

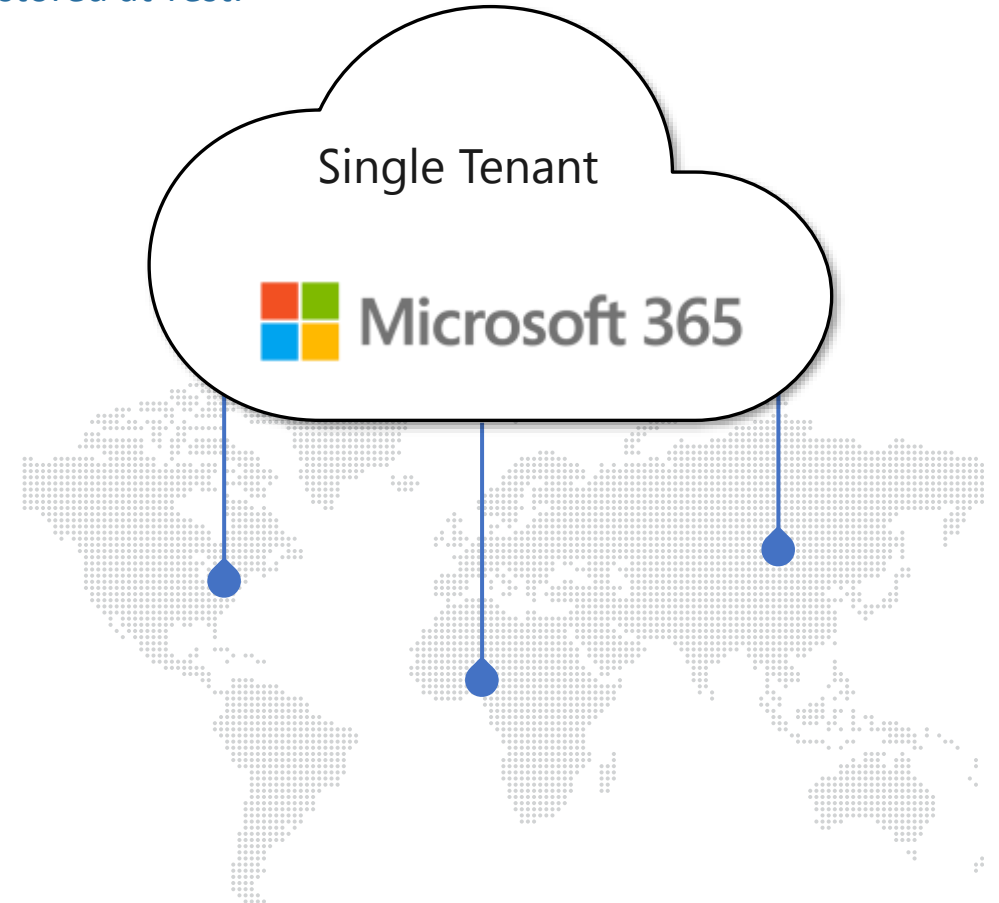

OneDrive

SharePoint

Microsoft 365 Groups

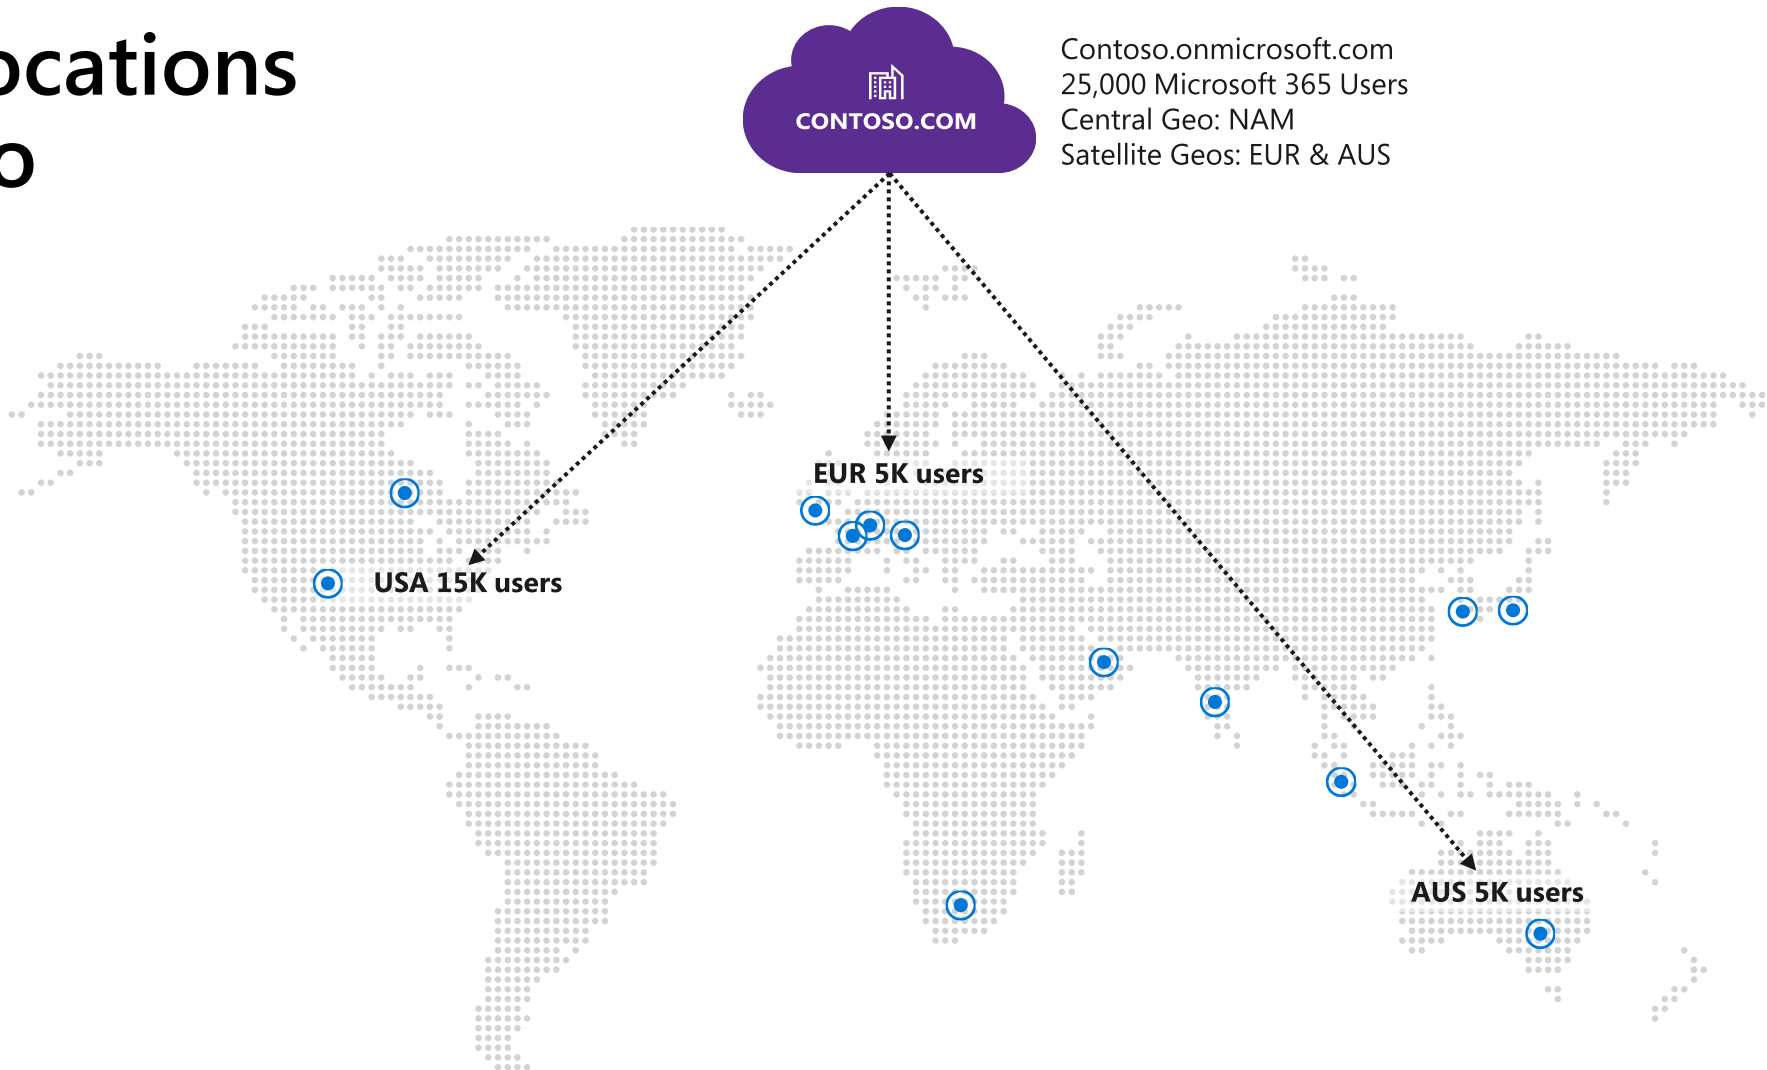

# Global Data Locations with Multi-Geo

## Granular data location controls

Easily control the country or region where each user's Microsoft 365 data is stored at-rest and address your global data residency needs.

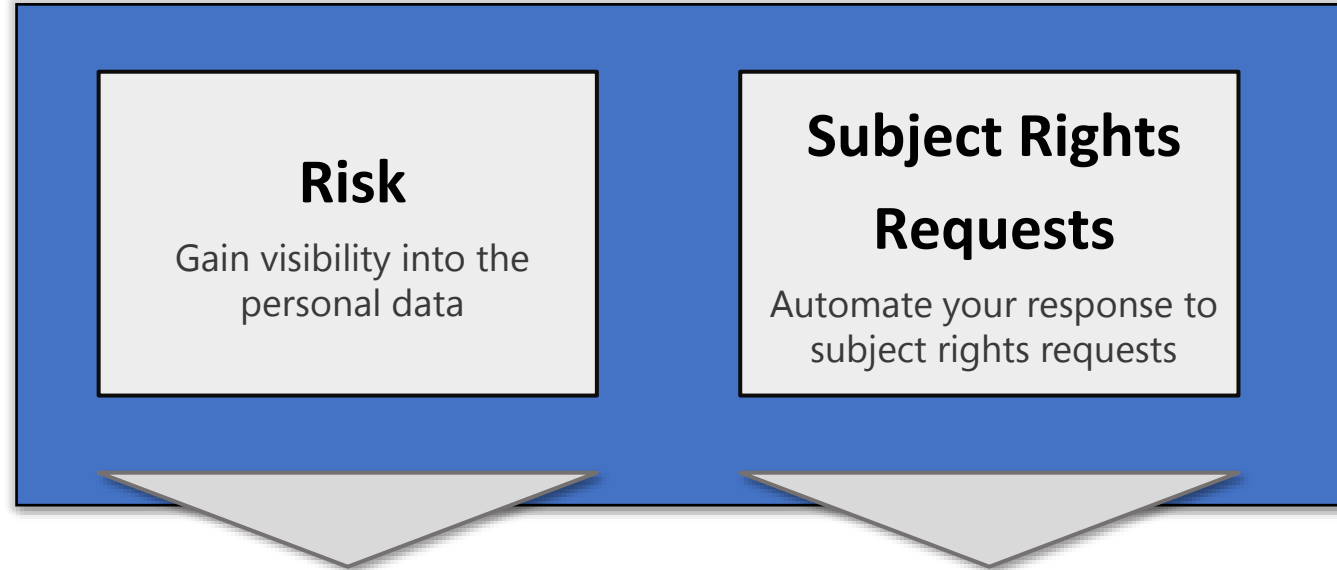

## Unlock modern productivity for all

Use a single Microsoft 365 tenant across your company and empower all employees with a modern collaboration experience, regardless of their location.

📍 **Geos:** Australia, Asia Pacific, Canada, European Union, France, India, Japan, Korea, United Kingdom, United States, United Arab Emirates, South Africa, and Switzerland
